CHARMI DHARMENDRAKUMAR PARMAR

Salt Lake City, UT | 8573135725 | charmidmparmar@gmail.com | LinkedIn | Portfolio | AWS SAA - Certified

SUMMARY

Software engineer skilled in **full-stack** & **cloud-native** solutions. Proficient in **Java, Python, React, Terraform, AWS** & **Agile** methods with 3+ years of experience in building scalable platforms, backend systems, data pipelines, & visualization.

PROFESSIONAL EXPERIENCE

Software Engineer, *KGS Technology Group Inc, Alpharetta, GA* *July 2025 – Present*

- Orchestrated **10+ REST APIs** with **Python (Flask)**, **AWS Lambda**, **API Gateway, S3, RDS** & **DynamoDB**, integrating with front-end applications and reducing data processing latency by 30%.
- Automated **CI/CD pipelines** for 50+ **Java**-based services using **Jenkins**, **Git**, & **GitHub**, reducing deployment time by 80%.
- Engineered complex **SQL queries** in **Snowflake** to support regulatory **data validation** & **reconciliation**, reducing **35%** query runtime.
- Built **Java**-based middleware solutions (ETL/ELT) using **Spring Boot**, and **Kafka** for financial microservices increasing data processing throughput by 35%.
- Collaborated with stakeholders in **Agile/Scrum** teams, translating business requirements into scalable technical solutions.
- Conducted unit, integration, and regression testing (TDD) using **JUnit**, **Postman**, and **SoapUI** in DEV and SIT environments.

Software Engineer, *Humanitarian AI (Formerly Abecedarian LLC), Boston, MA* *July 2024 – July 2025*

- Spearheaded development of a full-stack application using **React JS** for HR information system (HRIS), improving accessibility for 10k+ users.
- Delivered **5+ Python microservices** through full SDLC, Agile methods, **Jenkins for CI/CD**, & **JIRA** for project management.
- Containerized 15 microservices with **ECS & EKS** to ease deployments across environments, enhancing portability by 60%.
- Streamlined onboarding workflows with **SQL stored procedures (Oracle DB)**, cutting application onboarding time by 50%.
- Collaborated with cross-functional teams on **generative AI research** and integrated **Gen AI** and **LLM**-powered features into internal workflows (search, summarization, & automation), improving developer productivity by 15%.

Software Engineer, *Optimum Engineers, Vadodara, India* *June 2021 – August 2022*

- Architected cloud-native backend services using **Java**, & **AWS** (**EC2, Lambda, S3**), improving system availability by 25%.
- Automated infrastructure provisioning & deployments with **Terraform**, decreasing environment setup time by 40%.
- Implemented event-driven architectures using **Kafka**, enabling asynchronous communication between services and increasing data processing throughput by 35% across distributed systems.
- Configured **ELK stack (Elasticsearch, Kibana)**, improving incident response time with real-time monitoring & log analysis.
- Streamlined collaboration & integration by documenting **REST APIs** with **Swagger**, improving cross-team communication.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate *Valid till: February 2029*

PROJECTS

Cloud-Native Assignment Management **|** *AWS, GCP, Packer, Terraform, Git, CI/CD, YAML, Bash, Java, Linux, MySQL*

- Formulated and automated **AWS infrastructure** provisioning **(VPCs, EC2, RDS, DNS, CloudWatch, DynamoDB)** with **Terraform** & **GitHub Actions** for CI/CD integration, automating testing, AMI creation, & securing access with IAM policies.
- Crafted 10+ **RESTful APIs** for assignment management using **Java and JWT**, scalable to handle 10,000+ requests/min.

Comprehensive ETL and Data Modeling **|** *Alteryx, Talend, ER Studio, Power BI, Tableau, SQL, MySQL, Google Big Query, Azure*

- Architected data pipelines using **Alteryx and Talend** to extract, transform and load 125 million+ raw data points into SQL Server using SSMS, boosting data quality by 70%.
- Implemented **Star and Snowflake schema** to design **Enterprise DataWarehouse (EDW)** model, catering to OLAP needs.

KEY SKILLS AND PROFICIENCIES

Programming and OS	Java, Spring, Spring Boot, Python, JavaScript, React JS, SQL, SOAP, REST, Linux, Unix, JSON, XML
Data & Analytical Tools	Tableau, QuickSight, Apache Spark, Kafka, S3, Redshift, Glue, Lambda, Glacier
Database Management	Relational Database, Redshift, MySQL, PostgreSQL, NoSQL, DynamoDB, MongoDB, Cassandra
CI/CD & Cloud Platforms	Git, Jenkins, GitHub, Elasticsearch, Kibana, AWS, Docker, Kubernetes, Packer, Terraform
Integration Testing	JUnit, Maven, Postman, SOAPUI, Agile, Scrum, Kanban, JIRA, Confluence, Test Automation

EDUCATION

Masters in **Computer Software Engineering**, *Northeastern University, Boston, MA* *September 2022 - May 2024*

Bachelors in **Computer Science**, *Nirma University, Ahmedabad, IN* *August 2018 - May 2022*
